

NEW GENERATION CARROT VARIETIES

NANTES TYPES

MARLIN

EARLY NANTES HYBRID

Earliness and excellent color

make this hybrid suitable for bunching and fresh market

Maturity	Early, 90-95 days after germination
Plant	Strong, very healthy, upright plant
Root	Length – 19-21 cm, conical shape, dark orange colour
Usage	For bunching and for fresh market (washing and pre-pack)
Mechanical harvest	Suitable
Sowing density	1,3-1,5 million per hectare

Advantages

- ✓ Short growing cycle
- ✓ Nantes/Kuroda type suitable for hot and wet condition
- ✓ Tolerant to leaf diseases and bolting
- ✓ Excellent intensive dark orange colour
- ✓ Very uniform roots and high marketable yield
- ✓ The best choice for bunching
- ✓ Extra income thanks to outstanding quality and earliness
- ✓ Can be grown before or after the main carrot season due to its short growing cycle

NEVA

MAIN SEASON NANTES HYBRIDS

Very adoptable and stress tolerant

Nantes carrot variety suitable diverse growing conditions

Maturity	Medium-early, 115-120 days after germination
Plant	Dark green leaves, medium-strong and upright plant type
Root	Length – 20-24 cm, cylindrical shape, bright orange colour
Usage	For fresh market (washing and pre-pack) and processing
Mechanical harvest	Suitable
Sowing density	1,3-1,5 million per hectare

Advantages

- ✓ Good germination even with high temperatures
- ✓ High stress tolerance
- ✓ Always provide uniform roots
- ✓ Stable marketable yield in diverse climatic conditions
- ✓ The best choice for semi-professional farmers
- ✓ Suitable for fresh market, juice production and processing

BELUGA (BB CAR 0565)

MAIN SEASON NANTES HYBRIDS

Very uniform with dark orange color
Nantes carrot variety for multipurpose production

Maturity	Medium, 120-125 days after germination
Plant	Strong, upright and healthy
Root	Length – 22-24 cm, cylindrical shape, dark orange colour
Usage	Multipurpose: fresh market, processing and storage
Mechanical harvest	Very suitable
Sowing density	1,2-1,6 million per hectare

Advantages

- ✓ Strong upright plant very suitable for mechanical harvest
- ✓ Very tasty, small core and uniform dark orange coloration
- ✓ Exceptional root uniformity and smoothness
- ✓ The best choice for fresh market – looks attractive after washing and polishing
- ✓ Long shelf life – keeps fresh longer than other varieties
- ✓ Suitable for processing and long-term storage

COD

MAIN SEASON NANTES HYBRIDS

"Cigar" root shape with uniform blunted tip Nantes carrot variety ideal for fresh market and processing

Maturity	Medium, 120-125 days after germination
Plant	Medium-strong
Root	Length – 20-24 cm, cylindrical shape, orange colour, uniform blunted tip fill
Usage	For fresh market (fresh-pack) and processing (slicing)
Mechanical harvest	Suitable
Sowing density	1,4-1,8 million per hectare

Advantages

- ✓ High percentage of blunted tip fill – cigar type with proper cylindrical shape
- ✓ Very smooth and uniform roots
- ✓ Tolerant to cracking and forking
- ✓ Can be grown with higher sowing density
- ✓ Uniform roots looks good as fresh-pack
- ✓ Very suitable for processing (slicing – almost no waste)

STURGEON

MAIN SEASON NANTES HYBRIDS

Big size potential with dark orange color
Nantes carrot variety with very high yield potential

Maturity	Medium-late, 120-140 days after germination
Plant	Strong, upright and healthy
Root	Length – 20-26 cm, cylindrical shape, dark orange colour, big size potential, small core
Usage	Multipurpose: fresh market, processing and storage
Mechanical harvest	Very suitable
Sowing density	1,2-1,4 – processing, million per hectare 1,4-1,6 – fresh market, million per hectare

Advantages

- ✓ Strong plant vigour makes it suitable for mechanical harvest
- ✓ Big size root potential with small core
- ✓ High uniform, smoothness and dark orange coloration
- ✓ Because of nice quality suitable for fresh market
- ✓ Because of high yield potential fit well for processing industry
- ✓ Suitable for long term storage (6 months)
- ✓ Can reach bigger root size if stays longer in field (Bangor and Berlicum type)
- ✓ Suitable to grow on heavy soil type

NANTES CASTLE

NANTES OP VARIETY

Famous and adaptable OP

Nantes carrot variety for multipurpose production verified by growers

Maturity	Medium-early, 110-115 days after germination
Plant	Medium-strong, upright
Root	Length – 17-21 cm, cylindrical shape, bright orange colour
Usage	Fit well for fresh market and processing
Mechanical harvest	Suitable
Sowing density	1,6-2,1 million per hectare

Advantages

- ✓ Genetically strong seeds vigour secure good field germination
- ✓ Relatively short production cycle
- ✓ Bright orange root coloration
- ✓ Very adaptable for variable growing conditions
- ✓ The best choice for semi-professional growers with basic growing technology
- ✓ High percentage of marketable yield
